

Training Guide

General Tips

Important: The following training instructions were written to be used with the Remote Transmitter programmed to modes 1 through 4

- Eliminate one misbehaviour or teach one obedience command at a time. If you move too fast with the training, your dog may become confused.
- Be consistent. Give your dog an Audible Tone or Stimulation with each misbehaviour.
- Do not over-correct your dog. Use as few Stimulations as possible to train your dog.
- Unless you can supervise him, it is recommended that you restrict your dog from situations in which he has a history of misbehaving. However, setting up a situation as a training session can dramatically improve your chances of success.
- If your dog reacts to the training by hiding or acting fearful, redirect his attention to a simple and appropriate behaviour such as the “Sit” command.
- Never use the Remote Trainer to correct or eliminate any form of aggressive behaviour. If you are unsure if your dog is aggressive, please consult your veterinarian or a certified trainer.
- The objective is to train your dog to respond to your spoken command and the Audible Tone from the receiver in normal circumstances. After proper training, the use of Stimulation should only be necessary if your dog repeats unwanted behaviour.

Teaching Basic Obedience

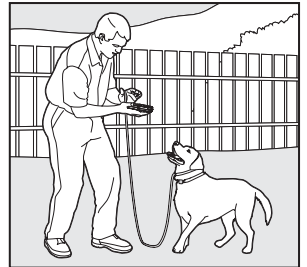

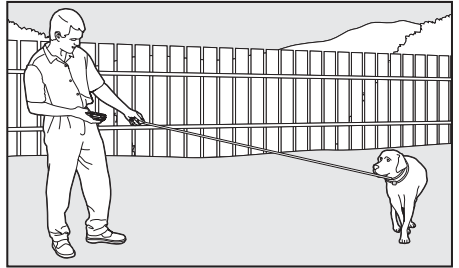

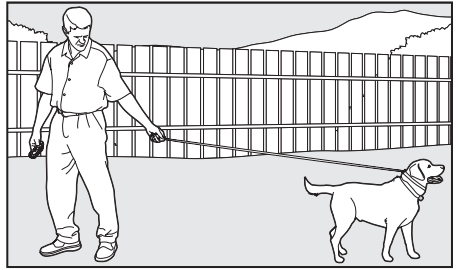

Note: Keep your dog close to you while teaching the "Sit" command.

The "Sit" Command

1. Put a separate, non-metallic collar on your dog's neck ABOVE the Collar Receiver, and attach a 3 metre lead. *Note: Be sure the extra collar does not put pressure on the Contact Points.*
2. Hold your lead and Remote Transmitter in one hand. Press and hold the Side Button to send an Audible Tone to your dog while saying "Sit" and if necessary using your free hand to guide your dog into a "Sit" position. Release the Side Button immediately when your dog sits. Repeat this several times.
3. If your dog sits reliably on receiving the Audible Tone and the spoken "Sit" command, then training is complete. Release your dog from the "Sit" position and praise him. If not, move on to Step 4.
4. Hold the lead and Remote Transmitter in one hand. Press and hold the Upper Button to send an Audible Tone and Stimulation to your dog while saying "Sit" and if necessary using your free hand to guide your dog into the "Sit" position. Release the Upper Button immediately when your dog sits. Repeat this several times.
5. If your dog now sits reliably on receiving an Audible Tone and Stimulation with the spoken "Sit" command, he may now be ready to respond without Stimulation. Take a play break and then go back and repeat from Step 2 with Audible Tone only.

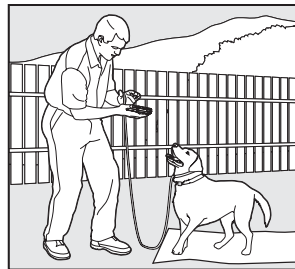

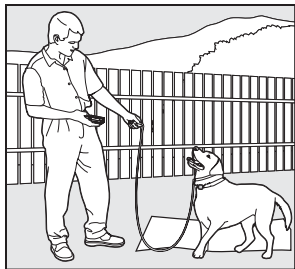

The “Come” Command

1. Put a separate, non-metallic collar on your dog’s neck ABOVE the Collar Receiver, and attach a 3 metre lead. *Note: Be sure the extra collar does not put pressure on the Contact Points.*
2. Hold your lead in one hand and the Remote Transmitter in the other.
3. Wait for your dog to walk away from you.
4. Press and hold the Side Button to send an Audible Tone to your dog while saying “Come” and if necessary use the lead to guide your dog toward you.
5. Immediately release the Side Button as soon as your dog steps toward you, and praise him enthusiastically.
6. Quickly move backwards as your dog begins to come toward you, praising him the entire time. Stop moving backwards and praise your dog when he returns to you.
7. Repeat steps 3 to 6 several times.
8. If your dog comes to you reliably on receiving the Audible Tone and the spoken “Come” command, then training is complete. Release your dog and praise him. If not, move on to Step 9.
9. Wait for your dog to walk away from you. Using the Recognition Level for your dog, press and hold the Upper Button to send an Audible Tone and Stimulation to your dog while saying “Come” and if necessary use the lead to guide your dog toward you.
10. Immediately release the Upper Button as soon as your dog steps toward you, and praise him enthusiastically.
11. Quickly move backwards as your dog begins to come toward you, praising him the entire time. Stop moving backwards and praise your dog when he returns to you.
12. Repeat steps 9 to 11 several times.
13. If your dog now comes to you reliably on receiving the Audible Tone and Stimulation with the spoken “Come” command, he may now be ready to respond without Stimulation. Take a play break and then go back and repeat from Step 3 with Audible Tone only.

The “Stay” Command

1. Put a separate, non-metallic collar on your dog’s neck ABOVE the Collar Receiver, and attach a 3 metre lead. *Note: Be sure the extra collar does not put pressure on the Contact Points.*
2. Visibly identify where you want your dog to sit by placing his bed or a large piece of cloth on the ground.
3. Put your dog on his bed. Hold your lead in one hand and the Remote Transmitter in the other.
4. Staying at approximately 1 metre, walk around the perimeter of the bed. Do not say anything to your dog.
5. If your dog tries to leave the bed, press and hold the Side Button to send an Audible Tone to your dog while saying “Stay” and if necessary guide your dog back to his bed.
6. Immediately release the Side Button as soon as your dog returns to his bed, and praise him enthusiastically.
7. Once your dog has settled, release him and play calmly.
8. Repeat steps 3 to 7 several times.
9. If your dog stays reliably on receiving the Audible Tone and the spoken “Stay” command, then training is complete. Release your dog and praise him. If not, move on to Step 10.
10. Put your dog on his bed and walk around the perimeter of the bed as before.
11. Wait for your dog to try to leave the bed. Using the Recognition Level for your dog, press and hold the Upper Button to send an Audible Tone and Stimulation to your dog while saying “Stay” and if necessary guide your dog back to his bed.
12. Immediately release the Upper Button as soon as your dog returns to his bed, and praise him enthusiastically.
13. Once your dog has settled, release him and play calmly.
14. Repeat steps 10 to 13 several times.
15. If your dog stays reliably on receiving the Audible Tone and Stimulation with the spoken “Stay” command, he may now be ready to respond without Stimulation. Take a play break and then go back and repeat from Step 3 with Audible Tone only.

Eliminating Unwanted Behaviour

Jumping Up

Dogs typically jump up to get attention. If you do not want your dog to jump on you, then friends or members of the family should not encourage this behaviour. That means every time your dog jumps on someone, he should be reprimanded or redirected to an alternate and acceptable behaviour, for which he can receive praise.

Note: It is best if your dog first understands the “Sit” command.

1. Choose the Stimulation Level one step higher than your dog’s Recognition Level.
2. As soon as your dog lifts his paws off the ground to jump on you, press and hold the Upper Button to send an Audible Tone and Stimulation and give the command “Sit.”
3. Release the Upper Button immediately once your dog is sitting, and verbally praise him.
4. Practice this exercise in several different areas and use different people for distractions.

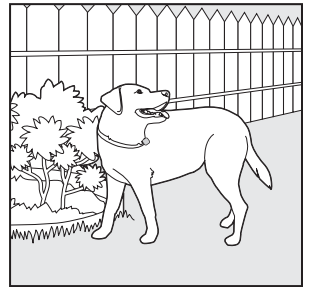

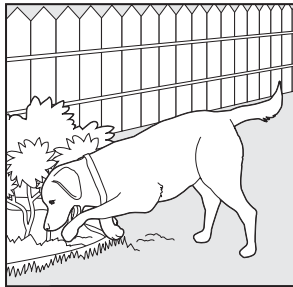

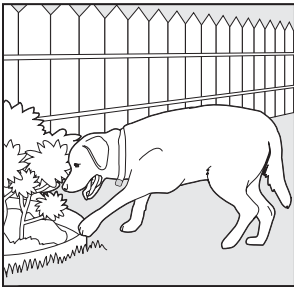

Digging

It is important to first understand why your dog is digging. Many dogs, such as terriers, were bred to flush out prey, and digging is very innate to them. Other dogs may be digging to find a cool spot to lie down, or simply out of boredom. Your dog may no longer have the desire to dig if he is provided with the following:

- A cool, shaded area in which to lie down, and plenty of water.
- An alternate activity, such as a favorite toy.
- Plenty of play, exercise, and attention.
- A garden free from rodents or prey that he may be trying to flush out.

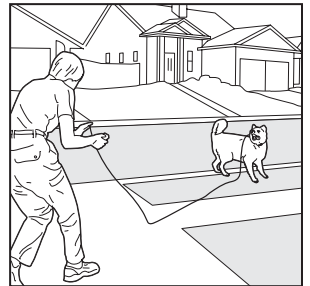

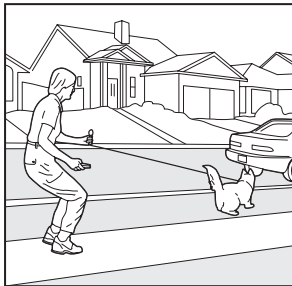

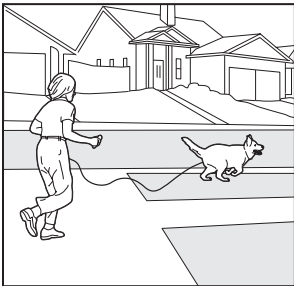

1. Choose the Stimulation Level one step higher than your dog's Recognition Level.
2. Place the Collar Receiver on your dog and wait at least 10 minutes before placing him in the garden. No other people or dogs should be in the garden, as you do not want your dog to associate the Stimulation with anything other than his digging. Your dog must be securely fenced in or contained during training.
3. From a window or area where your dog cannot see you, wait until your dog begins to dig.
4. While your dog digs, press and hold the Upper Button to send an Audible Tone and Stimulation. Release the button immediately when he stops digging.
5. Continue to watch your dog, as he may choose another area to dig.
6. Do not allow your dog in the garden unsupervised until he has completely stopped digging.

Chasing

Chasing is an instinctive behaviour stimulated by moving objects. Some dogs have a particularly strong desire to chase that can put them in harm's way and leave you helpless. Never allow your dog off the lead or out of a contained area until he has learned the "Come" command, regardless of the distraction. Be consistent and correct your dog every time he chases something.

1. It is vitally important that you and your dog remain safe while carrying out this training. Your dog should be on a strong lead, long enough for him to attempt to chase an object, but short enough for him not to reach a road or other unsafe area. You must also be physically strong enough to restrain your dog when he tries to chase.
2. Choose the Stimulation Level one step higher than your dog's Recognition Level.
3. Set up a scenario where your dog is enticed to chase an object. Common items could be cars, motorcycles, bicycles, etc. (do not use toys).
4. When the object passes in front of your dog, make sure to hold the lead with a firm grip. As soon as your dog begins to chase the object, give the "Come" command and press and hold the Upper Button to send an Audible Tone and Stimulation until he stops. If he fails to stop, restrain him with the lead before he reaches danger.
5. When your dog stops chasing the object, immediately release the Upper Button, walk backwards and give the command "Come." Praise your dog as he comes to you.
6. Repeat the process until your dog responds consistently to the "Come" command.

Excessive Barking

Barking is an instinctive behaviour for dogs. It is impossible to keep your dog from barking entirely, but you can teach him to be quiet when you give him a command.

Note: This will only be effective when you are at home with your dog.

1. Choose your dog's Recognition Level.
2. Put your dog in a situation that will tempt him to bark.
3. When your dog begins to bark, press and hold the Upper Button to send an Audible Tone and Stimulation and give him the command "Quiet."
4. Release the Upper Button immediately once your dog stops barking and praise him.
5. Practice this exercise in different areas using different situations that would cause your dog to bark.
